Physicians office Resource™

Resources for You, Your Patients, & Your Practice

2020 BUYERS GUIDE

Getting the most from this guide

There are two simple ways to request information about the products and services found in Physicians Office Resource.

1. Go to www.PhysiciansOfficeResource.com and enter the four-digit reference number found next to the product or service into the search field, then request additional information, schedule a demo, or speak with a sales agent all with just a simple click of a button.

2. Find the Business Reply Card in this issue, circle the desired reference numbers, complete the form, and drop into any USPS mailbox. A representative will contact you as quickly as possible to answer your questions.

To continue your free subscription of Physicians Office Resource magazine, please fill out the Business Reply Card (BRC) located within this magazine and drop in any United States Post Office mailbox.

If you are a manufacturer of medical products or provide services to medical professionals and would like to advertise your products or services to the nation's top physicians doing in-office testing, call 801-380-6094 or visit: POR.io for more information.

Nail it with one swab.

Syndromic respiratory infection testing now CLIA-waived

The BioFire® FilmArray® Respiratory Panel (RP) EZ uses a molecular syndromic approach to accurately detect and identify a wide range of pathogens—not just Flu A and B. As a healthcare provider, this means your patients can receive the right treatment the first time, potentially leading to higher patient satisfaction and lower costs. And as the name implies, it's easy and can be performed right in your office or clinic.[1]
1 test. 14 respiratory pathogens. All in about an hour.

biofiredx.com

BioFire RP EZ Pathogens

Viruses
Adenovirus
Coronavirus
Human Metapneumovirus
Human Rhinovirus/Enterovirus
Influenza A
Influenza A/H1
Influenza A/H1-2009
Influenza A/H3
Influenza B
Parainfluenza Virus
Respiratory Syncytial Virus

Bacteria
Bordetella pertussis
Chlamydophila pneumoniae
Mycoplasma pneumoniae

[1] CLIA Certificate of Waiver required to perform testing.

TURN SMALL PLACES INTO SMART SPACES

With reduced budgets, shrinking laboratory space and staffing challenges, many laboratories need a solution that lets them work smarter with less.

The CELL-DYN Emerald 22 AL is a full performance, automated, optical 5-part differential analyzer that delivers smarter results for small to mid-size clinical laboratories with:

- **Compact design** maximizes valuable laboratory space
- **Ease of use** and **walkaway** functionality optimizes staff time
- **Smart open tube sample device** ensures user safety

Visit **www.corelaboratory.abbott/hematology** to learn how the new CELL-DYN Emerald 22 AL can help your laboratory operate more efficiently.

CHOOSE TRANSFORMATION™

Achieve measurably better healthcare performance.

CELL-DYN Emerald 22 AL is a Class 1 laser. For *in vitro* diagnostic only.
Refer to the Operator's Manual for operational precautions, limitations, and hazards.
CELL-DYN Emerald and CHOOSE TRANSFORMATION are trademarks of Abbott Laboratories in various jurisdictions.
CAUTION: United States Federal law restricts this device to sale and distribution by or on the order of a physician, or to a clinical laboratory.

EasyRA® Chemistry Analyzer

General Chemistries and Urine Drug Screens on a Single Analyzer

It's an easy choice.

The EasyRA® benchtop analyzer features:

- Moderate complexity
- Extensive test menu
- Urine drug screens
- General chemistry tests
- Up to 300 tests per hour (480 with integrated ISE)
- Intuitive user interface
- Stat results in less than 8 minutes
- Does not require a water system
- Easy to learn, operate and maintain

Less migraine. More moments.™

Help patients say yes to more moments

- **AJOVY® (fremanezumab-vfrm) injection is the only anti-CGRP treatment for the prevention of migraine with quarterly and monthly dosing options[1]**
- **More migraine-free days with AJOVY in clinical trials[1]**

INDICATION

AJOVY is indicated for the preventive treatment of migraine in adults.

IMPORTANT SAFETY INFORMATION

Contraindications: AJOVY is contraindicated in patients with serious hypersensitivity to fremanezumab-vfrm or to any of the excipients.

Hypersensitivity Reactions: Hypersensitivity reactions, including rash, pruritus, drug hypersensitivity, and urticaria were reported with AJOVY in clinical trials. Most reactions were mild to moderate, but some led to discontinuation or required corticosteroid treatment. Most reactions were reported from within hours to one month after administration. If a hypersensitivity reaction occurs, consider discontinuing AJOVY and institute appropriate therapy.

Adverse Reactions: The most common adverse reactions (≥5% and greater than placebo) were injection site reactions.

Please see Brief Summary of full Prescribing Information on the following page.

To learn more, visit AJOVYhcp.com

CGRP: calcitonin gene-related peptide.

Reference: 1. AJOVY® (fremanezumab-vfrm) injection Current Prescribing Information. North Wales, PA: Teva Pharmaceuticals USA, Inc.

AJOVY®
(fremanezumab-vfrm)
injection 225 mg/1.5 mL

BRIEF SUMMARY OF PRESCRIBING INFORMATION FOR
AJOVY® (fremanezumab-vfrm) injection, for subcutaneous use
SEE PACKAGE INSERT FOR FULL PRESCRIBING INFORMATION

1 INDICATIONS AND USAGE

AJOVY is indicated for the preventive treatment of migraine in adults.

2 DOSAGE AND ADMINISTRATION

2.1 Recommended Dosage

Two subcutaneous dosing options of AJOVY are available to administer the recommended dosage:

- 225 mg monthly, or
- 675 mg every 3 months (quarterly), which is administered as three consecutive subcutaneous injections of 225 mg each.

When switching dosage options, administer the first dose of the new regimen on the next scheduled date of administration. If a dose of AJOVY is missed, administer as soon as possible. Thereafter, AJOVY can be scheduled from the date of the last dose.

2.2 Important Administration Instructions

AJOVY is for subcutaneous use only.

AJOVY may be administered by healthcare professionals, patients, and/or caregivers. Prior to use, provide proper training to patients and/or caregivers on the preparation and administration of AJOVY prefilled syringe, including aseptic technique *[see Instructions for Use in full Prescribing Information]*.

- Remove AJOVY from the refrigerator. Prior to use, allow AJOVY to sit at room temperature for 30 minutes protected from direct sunlight. Do not warm by using a heat source such as hot water or a microwave. Do not use AJOVY if it has been at room temperature for 24 hours or longer.
- Follow aseptic injection technique every time AJOVY is administered.
- Inspect AJOVY for particles or discoloration prior to administration. Do not use if the solution is cloudy, discolored, or contains particles.
- Administer AJOVY by subcutaneous injection into areas of the abdomen, thigh, or upper arm that are not tender, bruised, red, or indurated. For multiple injections, you may use the same body site, but not the exact location of the previous injection.
- Do not co-administer AJOVY with other injectable drugs at the same injection site.

4 CONTRAINDICATIONS

AJOVY is contraindicated in patients with serious hypersensitivity to fremanezumab-vfrm or to any of the excipients *[see Warnings and Precautions (5.1)]*.

5 WARNINGS AND PRECAUTIONS

5.1 Hypersensitivity Reactions

Hypersensitivity reactions, including rash, pruritus, drug hypersensitivity, and urticaria, were reported with AJOVY in clinical trials. Most reactions were mild to moderate, but some led to discontinuation or required corticosteroid treatment. Most reactions were reported from within hours to one month after administration.

If a hypersensitivity reaction occurs, consider discontinuing AJOVY, and institute appropriate therapy.

6 ADVERSE REACTIONS

The following clinically significant adverse reactions are discussed in greater detail in other sections of the labeling:

- Hypersensitivity Reactions *[see Warnings and Precautions (5.1)]*

6.1 Clinical Trials Experience

Because clinical trials are conducted under widely varying conditions, adverse reaction rates observed in the clinical trials of a drug cannot be directly compared to rates in the clinical trials of another drug, and may not reflect the rates observed in clinical practice.

The safety of AJOVY was evaluated in 2512 patients with migraine who received at least 1 dose of AJOVY, representing 1279 patient-years of exposure. Of these, 1730 patients were exposed to AJOVY 225 mg monthly or AJOVY 675 mg quarterly for at least 6 months, 775 patients for at least 12 months, and 138 patients for at least 15 months. In placebo-controlled clinical trials (Studies 1 and 2), 662 patients received AJOVY 225 mg monthly for 12 weeks (with or without a loading dose of 675 mg), and 663 patients received AJOVY 675 mg quarterly for 12 weeks. In the controlled trials, 87% of patients were female, 80% were White, and the mean age was 41 years.

The most common adverse reactions in the clinical trials for the preventive treatment of migraine (incidence at least 5% and greater than placebo) were injection site reactions. The adverse reactions that most commonly led to discontinuations were injection site reactions (1%). Table 1 summarizes adverse reactions reported in the 3-month placebo-controlled studies (Study 1 and Study 2), and the 1-month follow-up period after those studies.

Table 1: Adverse Reactions Occurring with an Incidence of At Least 2% for Either Dosing Regimen of AJOVY and At Least 2% Greater Than Placebo in Studies 1 and 2

Adverse Reaction	AJOVY 225 mg Monthly (n=290) %	AJOVY 675 mg Quarterly (n=667) %	Placebo Monthly (n=668) %
Injection site reactions[a]	43	45	38

[a] Injection site reactions include multiple related adverse event terms, such as injection site pain, induration, and erythema.

6.2 Immunogenicity

As with all therapeutic proteins, there is a potential for immunogenicity. The detection of antibody formation is highly dependent on sensitivity and specificity of the assay. Additionally, the observed incidence of antibody (including neutralizing antibody) positivity in an assay may be influenced by several factors, including assay methodology, sample handling, timing of sample collection, concomitant medications, and underlying disease. For these reasons, comparison of the incidence of antibodies to fremanezumab-vfrm in the studies described below with the incidence of antibodies in other studies to other products may be misleading. Clinical immunogenicity of AJOVY was monitored by analyzing anti-drug antibodies (ADA) and neutralizing antibodies in drug-treated patients. The data reflect the percentage of patients whose test results were positive for antibodies to AJOVY in specific assays.

In 3-month placebo-controlled studies, treatment-emergent ADA responses were observed in 6 out of 1701 (0.4%) AJOVY-treated patients. One of the 6 patients developed anti-AJOVY neutralizing antibodies at Day 84. In the ongoing long-term open-label study, ADA were detected in 1.6% of patients (30 out of 1888). Out of 30 ADA-positive patients, 17 had a neutralizing activity in their post-dose samples. Although these data do not demonstrate an impact of anti-fremanezumab-vfrm antibody development on the efficacy or safety of AJOVY in these patients, the available data are too limited to make definitive conclusions.

8 USE IN SPECIFIC POPULATIONS

8.1 Pregnancy

Risk Summary

There are no adequate data on the developmental risk associated with the use of AJOVY in pregnant women. AJOVY has a long half-life. This should be taken into consideration for women who are pregnant or plan to become pregnant while using AJOVY. Administration of fremanezumab-vfrm to rats and rabbits during the period of organogenesis or to rats throughout pregnancy and lactation at doses resulting in plasma levels greater than those expected clinically did not result in adverse effects on development *[see Animal Data]*. In the U.S. general population, the estimated background risk of major birth defects and miscarriage in clinically recognized pregnancies is 2-4% and 15-20%, respectively. The estimated rate of major birth defects (2.2-2.9%) and miscarriage (17%) among deliveries to women with migraine are similar to rates reported in women without migraine.

Clinical Considerations

Disease-Associated Maternal and/or Embryo/Fetal Risk

Published data have suggested that women with migraine may be at increased risk of preeclampsia during pregnancy.

Data

Animal Data

When fremanezumab-vfrm (0, 50, 100, or 200 mg/kg) was administered to male and female rats by weekly subcutaneous injection prior to and during mating and continuing in females throughout organogenesis, no adverse embryofetal effects were observed. The highest dose tested was associated with plasma exposures (AUC) approximately 2 times that in humans at a dose of 675 mg.

Administration of fremanezumab-vfrm (0, 10, 50, or 100 mg/kg) weekly by subcutaneous injection to pregnant rabbits throughout the period of organogenesis produced no adverse effects on embryofetal development. The highest dose tested was associated with plasma AUC approximately 3 times that in humans (675 mg).

Administration of fremanezumab-vfrm (0, 50, 100, or 200 mg/kg) weekly by subcutaneous injection to female rats throughout pregnancy and lactation resulted in no adverse effects on pre- and postnatal development. The highest dose tested was associated with plasma AUC approximately 2 times that in humans (675 mg).

8.2 Lactation

Risk Summary

There are no data on the presence of fremanezumab-vfrm in human milk, the effects on the breastfed infant, or the effects on milk production. The developmental and health benefits of breastfeeding should be considered along with the mother's clinical need for AJOVY and any potential adverse effects on the breastfed infant from AJOVY or from the underlying maternal condition.

8.4 Pediatric Use

Safety and effectiveness in pediatric patients have not been established.

8.5 Geriatric Use

Clinical studies of AJOVY did not include sufficient numbers of subjects aged 65 and over to determine whether they respond differently from younger subjects.

Make It Easy!

ABI

PAD TESTING SYSTEMS IDEAL FOR PRIMARY CARE TO VASCULAR SPECIALISTS

From Newman Medical

Your patients Trust You to find their PAD
- You have many high risk patients, including anyone over 65 or diabetics or smokers
- Even if they are unaware of their PAD, 25% will have a heart attack or stroke within 5 years if not managed
- Patients often mistake symptoms of PAD for arthritis.

simpleABI Cuff-Link systems are easy to learn and use
- Push button remote, automatic calculations/waveforms
- PC based – reports are easy to save and share

Excellent Value and Reimbursements
- One test per week pays off system in less than one year
- Medicare reimbursements range from $80 to $220 depending on location and test

AESTHETICS

PORTABLE AESTHETIC LASER

From Aerolase

A highly versatile Medical Aesthetic Laser to add substantial new cash revenues to your practice. Your patients are seeking aesthetic and medical laser treatments from a quality medical care provider such as you. Aerolase - a company with deep expertise in compact laser technology - has developed a breakthrough in the form of a versatile, safe and gentle laser for a wide range of treatments. It is also a compact, affordable laser.

LASER LIPO NON-INVASIVE INSTANT INCH LOSS RESULTS

From Laser Lipo Ltd

The FDA Approved, Strawberry Laser Lipo is a ground-breaking treatment offering non-invasive, instant inch loss results to the Abdomen, Hips, Thighs, Arms, Back Fat, Buttocks, Male Chest and Knees, without any pain or downtime. The clinically proven, non-invasive laser treatment penetrates the skin to selectively target the fat cells underneath, leaving blood vessels, nerves and other tissue undisturbed. Only $24,750 and 0% in-house no credit check financing.

ALL-IN-ONE DIAGNOSTIC SOLUTIONS

OPTIMIZE PRODUCTIVITY AND EXPAND YOUR PRACTICE

From MedPod

The Medpod Medical Cart optimizes productivity and load balancing by enabling access to remote physicians during high volume periods or to reach low-density populations. Medpod's proprietary software integrates with a wide range of professional medical devices and gives the remote provider control of the devices to conduct an examination that is on par with a face-to-face visit. Patient images, audio and data can be captured, annotated, tagged and uploaded in real-time or stored and forwarded into the EHR by either remote or local provider.

DEFINING MOBILE TELEDIAGNOSTICS

From MedPod

With the ability to deploy into a medical office in less than 2 minutes, MobileDoc is the ultimate portable practice. Revolutionary in its compact and mobile design, MobileDoc integrates best-in-class professional medical-grade devices with state-of-the-art HD video and EHR connectivity. Physicians can provide care remotely that is on par or better than a face-to-face visit, including conducting basic exams, checking vitals, and performing specialty testing—shattering the boundaries of traditional care.

BRAIN FUNCTION ASSESSMENT

MEMORY LOSS BIOMARKERS TO AID IN DIAGNOSIS IN PRIMARY CARE PRACTICES

From Evoke Neuroscience

The eVox® System is an FDA 510(k) cleared medical device to aid primary and specialty care physicians in diagnosis of memory loss and other cognitive disorders. eVox® measures memory loss biomarkers that may aid in detecting memory loss sooner, identifying the root cause of memory loss, and performing a differential diagnosis. eVox® procedures are performed in-office and are reimbursable by Medicare and commercial payers.

BREATH TESTING

H2 CHECK – BREATH HYDROGEN MONITOR

From Micro Direct

Micro Direct is pleased to offer the H2 Check breath hydrogen monitor for simple screening of lactose or other sugar mal-absorption, bacterial overgrowth and the measurement of intestinal transit time. The H2 Check provides a fast and easy-to-read display of expired Hydrogen levels in ppm. Exhaling slowly through the H2 Check is all that is required to obtain a measurement. Please call 800-588-3381 or visit our website www.mdspiro.com for more information.

VIRAL/BACTERIAL MOUTHPIECE FOR CO BREATH TESTING

From Micro Direct

Micro Direct is pleased to introduce the NEW SafeBreath filter. It is the only viral/bacterial filtered mouthpiece for carbon monoxide (CO) breath testing available on the market. SafeBreath is a unique solution offering a combined filter and cardboard mouthpiece with >99% protection against both bacteria and viruses. Using SafeBreath not only protects your patient from potential cross infection during testing but also protects and increases the life of your fuel cell and eliminates the need for and cleaning of the plastic mouthpiece adapter! The SafeBreath (order #FM200) is packaged in a handy dispenser box for easy storage and dispensing.

Get more of the story, faster.

Improve patient flow with on-site, syndromic gastrointestinal disease testing from BioFire.

Waiting hours or days for laboratory results for gastroenteritis can make patient management decisions complicated. The BioFire® FilmArray® Gastrointestinal (GI) Panel simultaneously tests for 22 of the most commonly associated pathogens related to gastroenteritis. And now, tests can be performed right in the office.*

Faster Diagnosis. Better Patient Care.

Shorten Time to Results
With results in about one hour, you can diagnose patients faster and possibly reduce further medical follow-up.

Improve Operational Efficiency
The BioFire GI Panel is easy-to-use, it takes just two minutes of hands-on time and 0.2 mL sample in Cary Blair.

Prescribe the Right Treatment
Improve your Antimicrobial Stewardship Program by aiding in more accurate and timely diagnosis and potentially reducing unnecessary antibiotic prescriptions.

SELF-CONTAINED DIAGNOSTIC WORKSTATION

From Vitalograph

Vitalograph introduces the Compact Expert diagnostic workstation. The device is a full touch-screen based medical workstation, which comes equipped with Vitalograph's flagship Pneumotrac spirometer. This accurate, robust and linear Fleisch pneumotach produces over 50 spirometry parameters, automatically stores all test data, calibration data and clinical audit trail data in a secure network capable SQL Server database. An intuitive user interface enhances the routine workflow in most practices, allowing quick patient throughput. Beyond spirometry, it is a desktop testing station for ECG, Pulse Oximetry, Weight , COPD assessment, and Blood Pressure measurements.

DRUGS OF ABUSE TESTING AND ROUTINE CHEMISTRY PANELS ON A SINGLE ANALYZER

From Carolina Liquid Chemistries

Carolina Liquid Chemistries Corp. announces the successful launch of Medica Corporation's high-speed benchtop analyzer, the EasyRA®. The updated analyzer now operates at a photometric rate of up to 240 tests per hour or up to 480 tests per hour with ISE. The EasyRA urine drug screening and general chemistry reagents are CLIA categorized as moderately complex. This all-in-one system allows clinical laboratories to screen for drugs of abuse in urine while also allowing healthcare providers to assess routine chemistry panels on a single analyzer.

RANDOX
QUALITY CONTROL

INFECTIOUS DISEASE CONTROLS (SEROLOGY)

THIRD PARTY, MULTI-MARKER CONTROLS DESIGNED TO DELIVER ACCURATE & RELIABLE RESULTS

Our Acusera Infectious Disease (Serology) Controls are designed to deliver a cost effective, high quality solution for the analysis of infectious diseases whilst producing trustworthy results time and time again. Covering a wide range of infectious diseases, including HIV, Hepatitis, EBV, ToRCH and Lyme Disease, our true third party controls are compatible for use on some of the most popular immunoassay platforms, including Roche, Abbott, Siemens and Beckman among others.

These liquid ready-to-use controls have a superb 60 day open-vial stability ensuring material won't go to waste and are compatible for use with our interlaboratory data management software, Acusera 24•7.

CLIA-WAIVED OSOM® IFOB

From Sekisui Diagnostics

The CLIA-waived OSOM® iFOB test gives the physician and the patient a simpler, more compliant colon cancer screening option that is highly accurate and specific to human hemoglobin. With the ability of a convenient take home kit, patients can collect in the privacy of their own home with no dietary or drug restrictions in just one sample increasing the physician compliance for yearly screening.

GLUCOSE TESTING

ACCURATE, ACTIONABLE RESULTS FROM THE LEADER IN POINT-OF-CARE LIPID TESTING

From Abbott

The CLIA-waived Alere Cholestech LDX™ Analyzer is engineered for confidence, providing accurate, actionable, and readily accessible results that have set the standard in point-of-care lipid profile, cholesterol, and glucose testing. Results are easy to obtain. Fingerstick sampling and a small sample size (40µL) makes results less painful and time consuming.

MINÍÍMIZE THE HASSLE OF ESR TESTING IN YOUR LAB

From ALCOR Scientific

miniiSED™ is the newest of the iSED® family of ESR analyzers from ALCOR Scientific. The miniiSED™ measurement of ESR is accurate and unaffected by variables associated with traditional methodologies, such as hematocrit. This single position, fully automated ESR analyzer works directly from primary EDTA tubes, requires 100 µL of sample, has an internal barcode reader, and produces results in 15 seconds! miniiSED™ is the ideal solution to ESR testing for small laboratories, POL's, and emergency clinics. Proudly manufactured in the USA.

PENTRA 60 C+ HEMATOLOGY ANALYZER WITH 5-PART DIFFERENTIAL

From HORIBA Medical

Now you can have the same results hospitals and reference labs provide in a small, benchtop analyzer. The Pentra 60 C+ hematology analyzer provides a CBC with 5-part differential result using proprietary technology that ensures an accurate count and differential on the first run. Reduce repeats and reflex to the microscope with Pentra hematology technology.

FIRST EVER CLIA WAIVED HEMATOLOGY ANALYZER

From Sysmex

Faster test results, clinical decisions and greater practice efficiency are coming to physicians' offices with the first CLIA-waived CBC analyzer. Hematology diagnostics leader Sysmex is bringing more lab testing to the point of care. One of the most common blood tests can be conducted reliably and accurately on-site, in as few as three minutes. The device's ease of use and innovative technology means in-house staff can operate it in just a few easy steps, without lengthy certification and training. The new Sysmex XW-100 will improve health care efficiency and patient care.

HEMATOLOGY TESTING MADE EASY

From Sysmex

Designed for labs testing up to 25 samples per day, the Sysmex pocH-100i™ has the smallest footprint of any analyzer on the market. The instrument requires only 15uL of whole blood for reporting of 17 clinical parameters, including a 3-part WBC Differential. It is ideal for urgent care, physician office lab, small clinic, or any outpatient setting where a point of care CBC is needed.

EFFECTIVE INHALER TRAINING & ASTHMA/COPD MONITORING

From Vitalograph

Introducing the unique Vitalograph AIM™ (Aerosol Inhalation Monitor) designed to assist in training subjects to use their inhaler correctly. Mastery of the correct technique will support more accurate drug delivery and good patient compliance, resulting in better disease management and fewer visits to medical professionals. The device, which is reimbursable under CPT code 94664, provides visible feedback to the patient on the airway or lung location that the inhaled drug would have been deposited had it been an actual drug treatment. The techniques for inhalation are guided by audible tones and colorful graphics, and are preset to the inhalation protocols for metered dose inhalers, MDI with a spacer and dry powder inhalers. Pair this device with either an asma-1 home asthma FEV1 and PEF monitor or the copd-6 screener for COPD GOLD status, and you will have the ideal tool set for care of your fragile lung patients.

SPIROMETRY

LIGHTWEIGHT HANDHELD SPIROMETER

From Vitalograph

Vitalograph's In2itive combines the benefits of full spirometry, data integration and mobility in a small lightweight handheld spirometer. The In2itive features flow measurement with the robust, industry leading accuracy of the Fleisch pneumotach. The spirometer can store over 10,000 patients in memory, archive to a MicroSD memory card or synchronize seamlessly with the new Spirotrac V spirometry software. Printing is accomplished by quickly downloading to the included Vitalograph Reports software or via an optional accessory print cradle directly to standard office printers. The In2uitive has a color touchscreen featuring audible graphic incentives. Portability is enhanced with full day rechargeable battery life. A unique aspect of the product is a convertible flow head, which can either be mounted directly on the top of the device or separated to allow it to be held by the patient while the technician holds the device.

4 WAYS TO START IMMEDIATELY INCREASING REVENUE

1 ANS TESTING (can be combined with SUDOMOTOR into 1 full system)

- Takes less than 10 minutes to perform, software provides verbal cues
- Tests for autonomic balance, vascular health, physical/mental stress, peripheral nerve health and other critical hidden risk factors
- Reimburses $170/test using 3 CPT codes
- Provides a 1 page summary up to a full 24 page comprehensive report

7538

2 SUDOMOTOR TESTING (can be combined with ANS into 1 full system)

- Takes 3 minutes to analyze a patients' hands and feet
- Provides a 1 page summary report
- Assesses peripheral nerve health (c-fiber function) and asymmetry between each hand and foot
- Reimburses $130/test (national average)

7539

3 ALLERGY TESTING

- Turn Key, comprehensive system
- 80-panel test, NO HIGH RISK (shellfish/peanuts/berries)
- 2 Minutes to apply, 15 minutes to show results
- Reimburses average $270 - $350/test, costs ~ $100/test (antigens/applicators)
- Options for Immunotherapy Treatment

7540

4 NEURO-COGNITIVE TESTING

- Medicare mandates yearly cognitive assessment
- Takes 10-15 minutes to prep patient, 20 minutes to test
- Analyzes: brain health (EEG), brain processing speed (Evoke Potentials), heart health (EKG), mental health (neuropsychology)
- Reimburses using 6 CPT codes, National Average = $750 - $1000 per test
- Each test is processed into a fully-finished, clinically actionable report
- Easy to understand biomarkers facilitate more informed medical interventions, such as biofeedback

SERVICE ABOVE AND BEYOND

The Ocean Club Bahamas

BY BRANDI BROWER, TRAVEL EDITOR

"There are other places where the water is blue and clear, but there is nothing like it is in the Bahamas. It is so expansive and so absolutely beautiful, "Astronaut Scott Kelly claimed after passing over it in space for an entire year. "I think one of the reasons why we know that aliens have never come to Earth is because they would've all been here in the Bahamas. If you're going to land in the most appealing place from space," he joked, Well, if it's that beautiful from space, it's even more gorgeous in person.

The name Bahamas comes from the Spanish term Baja Mar or shallow sea. Over 700 islands that make up the country, situated between Cuba and Florida, are all surrounded by very shallow water, which is the reason for the terrific turquoise color. The brilliant blue hue comes from its white calcium carbonate (the stuff that makes seashells) sandy bottom and the intensity of light when it's reflected off the shallows and unabsorbed by the water - Mother Nature at its finest.

A short flight from Miami, I was shuttled off the main island of New Providence, passing through the capital Nassau en route to my final destination of Paradise Island. As we crossed over the Harry Belafonte Bridge (a Bahamian native), my driver apologizes for the color of the water. "Our water is much bluer than this," he laments, "Sorry that you do not see it as you should. You'll just have to come back." It was still a fantastic color, but the remnants of Hurricane Dorian had churned up the ocean enough to bring native criticism of the color.

Because of Dorian, I almost didn't visit the Bahamas. With the sad news of death and massive destruction, I almost canceled my visit to the island nation. But only two of the 30 inhabited islands were directly hit. The rest of the country was left untouched and open for business. Tourism makes up well over 50 percent of the Bahamians GDP and employees over half of its residents. The best way to help rebuild the neighboring islands effected by Hurricane Dorian is to visit the Bahamas, bring tourism back to the country.

"Welcome Home," was my greeting as I arrived at my destination. The luxury resort, The Ocean Club, a Four Seasons Resort, is tucked away like a precious secret on the north end of Paradise Island. A mile from the mass tourist attraction, the ever-popular Atlantis resort, The Ocean Club is private, pristine, and practically perfect, seemingly worlds away from its neighbor. Being one of the most exclusive resorts in all of the Caribbean, the moment you arrive at the airy white-washed French Plantation, you exhale. As you walk up the marble steps, your eyes are instantly focused straight ahead to the wide-open doors and the azure sea and green manicured lawn on the other side of the grand house. Like the Bahamian people themselves, the vibe of the resort is warm, caring, and inviting. A chilled towel scented with Emily Rose and a glass of the famous island concoction, Sky juice, I'm perfectly content, and I've only just arrived.

Spread out on 35 beautifully manicured acres, with just 107 super-luxe accommodations; the property never feels crowded. Choices range in sizes and modern amenities, which include guest rooms, suites, two-bedroom cottages, and 3-4 bedroom villas. Five, low-rise Caribbean-style buildings make up the Crescent Wing; each large

guest room boasts a balcony/patio facing the ocean, contemporary decor, spacious marble bathrooms with big jetted tubs, and walk-in steam showers. Beachfront suites come with more than generous space with living and dining area. The Hartford Wing is a single two-story, plantation-style building with an interior courtyard, connected to the grand house. Even though this building is part of the original 1962 property, all the rooms were part of a 25-million dollar renovation in 2015, making it even more modern than the newer Crescent Wing buildings.

The Ocean Club is terrific for entire families as well; residential style 3 and 4 bedroom private villas include private infinity pools, while two-bedroom garden cottages offer plunge pools. Like all Four Seasons Resorts, they provide the complimentary Kids' Club, welcoming guests ages 4-12 for supervised entertainment and the opportunity for the younger family members to make magical memories of their own. Whether it's a luxury beachfront room in the Crescent wing or one of the spacious ocean view rooms in the Hartford wing, you will feel indulged. All of which have flat-screen TVs with satellite, gourmet minibars, and 24-hour concierges. Welcome amenities, including gifts of fruit and rum cake, complimentary hats, and a beach bag. Best of all, the personal butler that appears at your door daily for turndown service and happily offers complimentary champagne and chocolate-dipped strawberries.

Referencing Plato; "Rhythm and harmony find their way into the inward places of the soul." My husband and I indulged in the resort's award-winning spa. We were escorted to one of eight Balinese-style spa villas with a private garden for our pampering. On two teak massage tables, in serene silence, we were nurtured with both relaxation and rejuvenation during a 50-minute couples massage. Afterward, we savored a Japanese Tea ceremony served to us by the spa therapists. Both then left the two of us to be secluded from the world as we experienced total tranquility amid the tropical surroundings, with the waterfall shower, the covered daybed and drawn hydrotherapy bath with two feet of bubbles and therapeutic oils. The treatment was transformative - harmonizing body and mind.

The only way to match our afternoon of bliss was to dine at Dune. Michelin star chef Jean-Georges Vongerichten has brought a carefree island sophistication to Paradise Island with his waterfront restaurant positioned just above the white sand and ocean waves on the resort grounds. The excellent fare is a crossing of Asian and French cuisine with Bahamian influence. A must-try: The Black Plate for two. With the stylized design, featuring a display kitchen and open patio doors allowing the crashing waves as ambient sound, the room setting is both exciting and calm.

White glove service is synonymous with all Four Seasons resorts. The Ocean Club is not the exception, but in fact, we felt the staff went above and beyond to make our visit enjoyable. One example: as my husband reminisced that the evening marked the 30th anniversary of our first date, our wait staff overheard us talking about our fond memories. We were happily surprised when they brought over a dessert for us to share with the "Happy Anniversary" scrolled on the plate. But the bigger surprise came when we walked back to our suite, opening the door to rose petals dropped on the floor leading to our bed. On the bed was a handwritten note wishing us a Happy 1st Date Anniversary, "…may you both be blessed for many years to come. With much love from your butler Ramesh and the entire Ocean Club family." Our waiter, Silvaro, had notified our butler Ramesh, and the delightful deed was done. Service above and beyond.

Our first full day, we were greeted with sunshine, swaying palm trees, and a beautiful breakfast served on our lovely patio. With our suite just a stone's throw away from the tidewaters rolling in, we admired the view in front of us. The contrast of the two white Adirondack chairs perched on the edge of the green lawn, and the two of us sitting at our table in our Frette waffle bathrobes, it felt as though we were enjoying our *meal in our own seclusive beach house. *Side note: the BEST Brioche Mango

French Toast I will ever have the pleasure of eating.

We decided our quest for relaxation would continue as we selected comfy lounge chairs at the Ocean Pool. The adults-only infinity pool was quiet and cozy. Couples, side by side, draping their arms on the outer edge and gazing out at that stunning sea, the view that incredibly was all of ours, at least for the duration of our stay. It wasn't long, a chapter or two into my book when the wait staff walked by with some fish tacos. Immoderation, being my middle name, I told her as she walked past me, that I too needed a couple of those tacos. With great haste, she went directly to the Ocean restaurant next to the pool to honor my request. As if the exceptional french toast wasn't enough that morning, I had to see if they tasted as yummy as they looked. They were.

If I had been seriously interested in exercising any of my over the top caloric intake, The Ocean Club has many options. The six Har-Tru tennis courts are available for free for both day and night use, the resort providing racquets at no charge. Resident tennis professionals arrange tennis clinics, games, and round-robin tournaments. Private lessons are available for a fee. Fitness center has both indoor and outdoor areas, rooms for Pilates, cardio, circuit training, and stretching. Free yoga classes are available on the yoga deck overlooking the ocean. Complimentary bicycles are available to help discover the island. They even have a badminton court. Sadly, I didn't take advantage of any of these free fitness opportunities.

However, I did jump at the chance to play the 18-hole, par 72 golf course designed by golf legend Tom Weiskopf. My husband is an excellent golfer, and he enjoyed the long track, stretching over 7,100 yards on Paradise Island's peninsula. A challenging course with water hazards, creative bunkers, and crazy crosswinds. However, I judged the course by the number of amazing water views, equally beautiful of both the Atlantic and Nassau Harbour, for my Instagram worthy images. My husband's scorecard faired well, my golf game was somewhat frustrating, but just being on such a lovely course redeemed my several bogies. We enjoyed a meal at the Club House, and the kindness of the Bahamian staff continued. We mentioned how much we liked the herbal tea; they had served my husband for his sore throat. As we were leaving, Valencia gave me a handful of tea envelopes and insisted I take them to help my husband's ailment. Service above and beyond.

Late in the afternoon, a rain shower blew through — a perfect time to feel famous at the infamous Martini Bar and Lounge in the grand house. A black grand piano is a prominent fixture in the room because of the many black and white photos in varied size sterling silver frames that adorn the top: Sinatra, Elvis, Mandela, Hemmingway, to name a few. The Queen and the Beatles both have The Ocean Club in common, not to mention three Bonds, as in Sean Connery, Pierce Brosnan, and Daniel Craig. The resort has been featured prominently

in two James Bond films, 1965's Thunderball and the 2006 remake of Casino Royale. James Bond swims up on the beach that I walked on. He's served a Martini at the bar, "shaken, not stirred." I drink my share of "Switcha," which is the Bahamian name for limeade. In the movie, Mr. 007 plays a masterful game of poker in the renowned lounge, the exact place where I beat my husband in Trivial Pursuit as we sat on the comfy couch. And for a brief time, my husband and I soaked in the nostalgia on a rainy afternoon.

The history of The Ocean Club proceeds the legendary reputation of the resort. The hideaway in the Bahamas has been redefining luxury for over 50 years. One of the world's wealthiest men, a Swedish industrialist, first developed the private estate in 1939 and called it Shangri-la. The property had a large house and the beginnings of beautiful landscaping, designed after the intricate gardens at the Chateau de Versailles in France. The property was sold twenty years later to Huntington Hartford II, a long-time winter resident of Nassau. The wealthy heir envisioned Shangri-la as a luxury hotel and a refuge for the world's elite. He petitioned the Bahamian government to name the property Paradise Island and built a luxurious 52-room hotel, which is the Hartford Wing.

Mr. Hartford invested significantly into his paradise, embellishing the 35-acres with fountains, marble sculptures, and terraced gardens. He purchased the Cloisters, remains of a 12th-century French monastery, which was initially collected by William Randolph Hearst in the 1920s, stored in a Florida warehouse for years. The Versailles Gardens today are a fascinating fixture on the small island strand. Spanning from the Nassau Harbour to the ocean on the other side, a walk on the premises or better still, a perfectly planned dinner for two, will transport you to another country and period. A memory maker if you're a hopeless romantic like me.

Fast forward to 2000, when Sal Kerzner, a South African hotel developer, acquired The Ocean Club. He restored and expanded the facilities, adding the Crescent Wing and DUNE restaurant.

Beside the Ocean Pool, there are two temperature-controlled pools. The Versailles Pool is an elegant adults-only sanctuary near the Versailles Terrace restaurant. The Family Pool creates family fun with a beach-style entry and features a waterfall and tropical lagoon vibe. Of course, the beach itself stretches five miles along the north shore of Paradise Island, offering options of paddle boarding, taking a plunge, or burying your toes in the soft white sand.

This luxury resort provides a respite away from the world. However, the staff also arranges many opportunities for exciting excursions during your visit. The Ocean Club guests have complimentary access to Aquaventure water park at the Atlantis, which features 141 acres of the waterscape, high-speed water slide, and a river ride. Also, providing complimentary shuttles to enjoy the nearby hotel's casino and restaurants. But if you're looking for something unique and tailored to your sense of adventure The Ocean Club offers: Luxury Yacht charters, Deep-Sea Fishing, Scuba Diving, and Snorkeling charters, Dolphin Interactions and Powerboat Adventures. Or perhaps you'd like to explore Old Nassau, the discovery of the islands and the colorful Pirate history, experience From Cane to Cask, a Bahamian Rum Experience. Venture on land or sea, or even both, the staff will make the arrangements for any/all exciting excursions.

Resort manager, Kristen Whyly, when asked what he feels sets The Ocean Club apart, he shared that it's the Bahamian people, the kindness and attention to the needs of the guests. He offered this narrative: "One of our resort lifeguards noticed a father wanted to bond with his sons but was competing with the boys' handheld electronics. The lifeguard asked the guest if he and his sons liked to fish? When the father affirmed that he and his boys loved fishing, the lifeguard offered to take the three of them to his secret fishing spot the next morning and would provide the poles and tackle. The family of three spent not one but two back-to-back days fishing with our employee and newfound friend. The father was so grateful, bonding with his boys in the Bahamas," Whyly adding, "The lifeguard saw a need and filled it." Service above and beyond.

Flu Season Brings Diagnostic Challenges

We Have Solutions!

Sekisui Diagnostics offers the most comprehensive line of flu diagnostic testing solutions on the market.

Whether you are looking for our proven OSOM® rapid tests, the Acucy™ reader, or Silaris® molecular technology, we have you covered.

CLIA WAIVED

osom® rapid diagnostics

Catalog #1006

- Visual Lateral Flow
- Good Accuracy
- Low Cost
- CLIA Waived
- Class II Compliant

7556

acucy™

Catalog #1010

- Digital Lateral Flow
- Better Accuracy
- Moderate Cost
- CLIA Waived
- Class II Compliant

7557

SILARIS®

Catalog #1027

- PCR Molecular
- Best Accuracy
- Higher cost but highest Reimbursement
- CLIA Waived
- Can be used for reflexing negative visual and digital lateral flow results

7558
