Getting the most from this guide

There are two simple ways to request information about the products and services found in Physicians Office Resource.

1. Go to www.PhysiciansOfficeResource.com and enter the four-digit reference number found next to the product or service into the search field, then request additional information, schedule a demo, or speak with a sales agent all with just a simple click of a button.

2. Find the Business Reply Card in this issue, circle the desired reference numbers, complete the form, and drop into any USPS mailbox. A representative will contact you as quickly as possible to answer your questions.

COVID-19 OR FLU? STOP GUESSING.

One swab, one test, results in just 10 minutes

From

SEKISUI DIAGNOSTICS

From only one sample, the OSOM® Flu SARS-CoV-2 Combo Test simultaneously detects and differentiates between COVID-19, Flu A, and Flu B in just 10 minutes, allowing healthcare providers to make more informed decisions when treating patients who are symptomatic with viral infections that have similar symptoms, but different treatment protocols. Designed for point-of-care testing, the OSOM® Flu SARS-CoV-2 Combo Test empowers healthcare providers with the confidence necessary to initiate immediate treatment and isolation protocols at the very first patient visit.

This test has not been FDA cleared or approved. It is authorized by FDA under an EUA for use by authorized laboratories. It has been authorized only for the detection of proteins from SARS-CoV-2, influenza A and influenza B, not for any other viruses or pathogens and is only authorized for the duration of the declaration that circumstances exist justifying the authorization of emergency use of in vitro diagnostics for detection and/or diagnosis of COVID-19 under Section 564(b)(1) of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C S360bbb-3(b)(1), unless the authorization is terminated or revoked sooner.

How To Create A Successful Business. Every Time.

BY DR. SHAKEEL AHMED

" Heavy is the head that wears the crown".

In the world of entrepreneurship, it is considered the pinnacle of success to own your business. Be the King. Run the empire. While for the novice entrant in this world that may seem like a dream trip through life, in reality it is a land filled with missteps, mines and ambushes. The greatest threat to your success, however, comes from within. It is the slow bleed of failures in finances and rampant overhead that will be your denouement.

Michael Jordan said, "I've missed more than 9,000 shots in my career. I've lost almost 300 games. Twenty-six times, I've been trusted to take the game-winning shot and missed. I've failed over and over and over again in my life. And that is why I succeed." It bodes well for the novice to take the advice of people who have the wisdom of failures behind them. When CEOs like me "preach" about success, we don't base it upon our successes. Rather, we are grounding it on all the times we fell and rose again from our failures.

The ship needs to be well managed in order to success, period. Indeed, to ensure the prosperity of your new venture, a degree of sternness is necessary. Your business isn't a democracy; employees can't simply vote for pay increases, and swift, decisive action in the interest of the company is often required. Success in business is challenging, or else it would be a common achievement.

Failure can stem from various factors, all metaphorically akin to the downfall of a kingdom. These include mismanaging finances, ineffective staffing, inadequate initial funding, legal issues, and insufficient marketing. Let's explore five critical areas that, if neglected, can derail your business:

1- Ineffective Staffing:

The Burden of Non-contributing Employees, or the lack thereof: The most common mistake a new business makes is to start with an overstretched team. The tensile strength of a new employee is very poor. Bend them too much, they break and bolt towards the door. In addition, identify and address employees who no longer contribute to the business's growth or who perform poorly. Maintaining a dedicated, honest, and customer-focused team is crucial

for survival. Implement regular performance evaluations to ensure each employee contributes positively to the business.

2- Initial Funding:

The Necessity of Financial Reserves: This is one of the most common mistakes I tend to see in startups. There is a prevalent belief, chalk it up to the concept of divine intervention or plain ignorance, that you can start with limited funds with the hopes of supporting yourself with incoming revenues. No. That will not happen. Adequate funding is crucial to cover expenses until the business becomes profitable. This involves a well-thought-out business model and sufficient initial capital to sustain the business during its early, unprofitable stages. The age-old financial theory of Free Cash Flow (FCF) = Operating Cash Flow (OCF) - Capital Expenditure (CapEx) still holds true. You will have expenses. You will need a generous reserve fund to survive until you have reached a momentum of persistently positive cash flow.

3- Financial Mismanagement:

Every new business faces startup costs, but survival hinges on generating revenue before funds deplete. Delayed payments from clients must be aggressively pursued to ensure cash flow. This includes following up on overdue accounts receivable with persistence and, when necessary, escalating the demands for payment. There is an old dictum that goes, "Take care of the Pennies, and the Pounds will take care of themselves". It still holds true in every aspect of business management.

4. Legal and Regulatory Compliance:

Ensuring compliance with legal and regulatory standards is essential to avoid fines and the costs associated with non-compliance. Effective legal counsel, whether through consultation or a retainer agreement, can help manage these risks. A simple misstep in following regulatory guidelines for establishing your business could lead to significant penalties or, worse, closure.

5. Proactive Marketing:

Your mom will always know what you are up to, including what you are doing in your work life. But, just your mom. Everyone else needs to be reached via google or Facebook marketing. Effective marketing from the start is critical for attracting customers from day one. In the digital age, traditional word-of-mouth must be supplemented with modern strategies like social media, SEO, and other digital marketing tactics to ensure visibility and success.

By addressing these areas proactively, you can protect your business from common pitfalls that lead to financial instability and failure, ensuring a prosperous future for your "kingdom." I end on the sage words of Thomas Edison: "I have not failed. I've just found 10,000 ways that won't work."

ABOUT THE AUTHOR:

Dr. Shakeel Ahmed

Spanning two decades, Dr. Shakeel Ahmed, a gastroenterologist turned healthcare mogul, has transformed his vision into the Midwest's leading Ambulatory Surgery Centers network. His dual expertise in medical administration and surgical execution-gained from years of frontline experience-has been pivotal in mastering the complexities of the healthcare sector. Dr. Ahmed's notable contributions extend beyond the ASC sphere; he has played a key role in developing a comprehensive healthcare network, including a range of medical facilities, diagnostic centers, and surgical establishments across several states. His literary contributions includes 6 published books alongside hundreds of articles in prestigious national and international journals. He is a consultant for multiple governments on healthcare development and works as an advisor to various governments across four continents in the establishment of outpatient surgery centers.

PAD TESTING SYSTEMS IDEAL FOR PRIMARY CARE TO VASCULAR SPECIALISTS

from Newman Medical

Your Patients Trust YOU To Find Their Peripheral Artery Disease
- High-risk patients include those over 65, diabetics, and smokers.
- If left untreated, 25% of patients with PAD will experience a heart attack or stroke within 5 years.
- PAD symptoms are often mistaken for arthritis or old age.

The simpleABI Cuff-Link System is Easy to Learn and Use.
- With a push-button remote, automatic calculations, and waveforms, it's incredibly user-friendly.
- Reports are straightforward to save and share since the system is PC-based.

Outstanding Value and Reimbursements
- The system pays for itself in less than a year with just one test per week.
- Medicare reimbursements vary by exam and location, averaging from $91 to $174.

BONE HEALTH

WHY BINDEX® IS A GAME-CHANGER IN OSTEOPOROSIS DIAGNOSTICS.

From Bindex Medical

Comparable to DXA
Extensive clinical research has proven Bindex to be 90% accurate in detecting osteoporosis. It can replace nearly 70% of DXA scans for patients with suspected osteoporosis.

Fast and effective
Using safe pulse-echo ultrasound to measure cortical bone thickness, Bindex analyzes bone density in just seconds.

Easy to use anywhere
Lightweight and pocket-sized, Bindex allows patients to receive on-the-spot bone density scans in doctors' offices, hospitals and clinics and at home.

CHEMISTRY ANALYZERS

DIAZYME DZ-LITE™ C270 BENCHTOP GENERAL/SPECIAL CHEMISTRIES + DRUG SCREENS

From Carolina Liquid Chemistries

A fully-automated, open system, benchtop clinical chemistry analyzer with throughput up to 270 tests/hour, 36 reagent positions, and 30 sample positions. It features a menu of over 60 CLIA moderate complexity assays, including cancer markers, cardiovascular markers, coagulation markers, diabetic markers, inflammatory markers, liver markers, renal/pancreatic markers, sepsis markers, vitamin markers, photometric electrolytes, and drugs of abuse. To learn more, visit https://www.carolinachemistries.com/products/dz-lite-c270-benchtop-chemistry-analyzer/.

EASYRA® BENCHTOP CHEMISTRIES + DRUGS

From Carolina Liquid Chemistries

When starting a lab, look no further. With a CLIA moderately complex menu of 35 general chemistries and 14 urine drug screens, the EasyRA is well-suited for oncology, rheumatology, and multi-specialty practices needing a benchtop clinical chemistry analyzer. The EasyRA offers photometric throughput of 240+ tests/hr (up to 480 tests/hr with ISE) and STAT samples in under 8 minutes. This all-in-one system is easy to learn and easy to operate.

FIRST EVER FDA-CLEARED AND CATEGORIZED, POINT-OF-CARE FENTANYL TEST (<6 MINUTES)

From Carolina Liquid Chemistries

Carolina Liquid Chemistries Corp. introduces the Fentanyl Urine Detection Test on CLC's next-generation RYAN™ immunofluorescent analyzer. This FDA cleared and CLIA categorized, moderately complex, compact, point-of-care system detects fentanyl qualitatively in human urine at a cutoff concentration of 1.0 ng/mL. The test can be run in < 6 minutes, produces a chartable result, and is interfaceable. For detailed information, visit carolinachemistries.com/products/fentanyl-urine-detect-on-clc-ryan-analyzer/.

3 WAYS TO START IMMEDIATELY INCREASING REVENUE

1 Neuro-Cognitive Testing

4313

- Medicare mandates yearly cognitive assessment
- Takes 10-15 minutes to prep patient, 20 minutes to test
- Analyzes: brain health (EEG), brain processing speed (Evoke Potentials), heart health (EKG), mental health (neuropsychology)
- **Reimburses using 6 CPT codes, National Average = $750 - $1000 per test**
- Each test is processed into a fully-finished, clinically actionable report
- Easy to understand biomarkers facilitate more informed medical interventions, such as biofeedback

2 ANS Testing

(can be combined with SUDOMOTOR into 1 full system)

4314

- Takes less than 10 minutes to perform, software provides verbal cues
- Tests for autonomic balance, vascular health, physical/mental stress, peripheral nerve health and other critical hidden risk factors
- **Reimburses $170/test using 3 CPT codes**
- Provides a 1 page summary up to a full 24 page comprehensive report

3 SudoMotor Testing

4315

(can be combined with ANS into 1 full system)

- Takes 3 minutes to analyze a patients' hands and feet
- Provides a 1 page summary report
- Assesses peripheral nerve health (c-fiber function) and asymmetry between each hand and foot
- **Reimburses $130/test (national average)**

CHEMISTRY ANALYZERS

DC-LINEATE CALIBRATION/ LINEARITY MATERIAL

From SEKISUI Diagnostics

The DC-Lineate is a unique, trilevel calibration/linearity material that is used in conjunction with assays for the quantitative determination of UIBC levels in clinical samples. The material is conveniently packaged in a 2 x 5 mL configuration for each of the three levels and is traceable back to the National Institute of Standards and Technology (NIST). It can be used on a broad range of clinical chemistry analyzers and has a shelf life up to 14-days after reconstitution.

Newman Medical

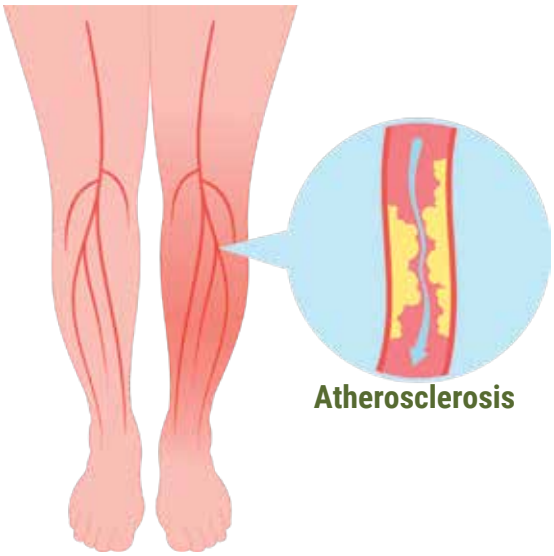

PERIPHERAL ARTERY DISEASE

(PAD) is an often silent condition where narrowed arteries reduce blood flow to the legs, causing symptoms like leg pain, numbness, and slow-healing wounds.

HOW MANY OF THESE PATIENTS DO YOU HAVE?

- Diabetics
- Smokers
- Over age 65

1 out of 3 HAS PAD

DON'T LET PAD SNEAK UP ON YOU OR THESE PATIENTS.
50% report no symptoms, while those that do attribute their pain to arthritis or "old age".

THESE PATIENTS *TRUST YOU* TO FIND THEIR PAD
before they have a heart attack, stroke, or even die. PAD also leads to significant disability and reduced quality of life.

INTRODUCING SIMPLEABI-Q: A USER-FRIENDLY SOLUTION FOR EARLY PAD TESTING.

EASY
- No Doppler or vascular anatomy knowledge necessary.
- Can be done in five minutes or less by any staff member.
- Non-invasive, patient-friendly test.

ACCURATE
- Accuracy equal or better than Doppler ABI.
- Useful for diabetics with calcified arteries.

REIMBURSABLE
- **Great ROI:** the typical internist has 800 Medicare patients, per ACP.
- Testing five patients per week can pay for the system in less than two months.
- CPT 93923, with a national average of $142/exam.

Newman Medical

With over 40 years of experience in diagnostic ultrasound, Newman Medical is a trusted leader in vascular testing solutions. Newman's ABI-Q rapid-test system epitomizes their commitment to pioneering technology. Built on integrity and expertise, count on Newman Medical for precise, rapid, and reliable vascular testing solutions.

CONTACT US NOW

to learn how early PAD detection benefits both your patients and your practice.

Multiplex Testing at the Point of Care

BY AARON MEDARIS, PHYSICIANS OFFICE RESOURCE

Is it influenza, COVID, RSV, or some other respiratory infection? HCPs are faced with these questions every day as patients fill their exam rooms with coughs, fevers, and congestion. Your training and experience will help you in your diagnosis and subsequent treatment, but with so many similar symptoms between different infections, the need for assistance and even assurance is at an all-time high. Luckily, testing at the point of care is becoming more advanced and effective. One of the most important advancements in point of care testing is the addition of multiplex testing – the ability analyze multiple analytes or targets in a single test. Multiplex testing is nothing new but has been steadily evolving over the last several decades and is gaining a larger presence in physician offices and urgent care centers around the nation. In this article, take a closer look at multiplex testing, its development over the years, and how it's making a difference in point of care testing.

Understanding Multiplex Testing

Multiplex testing, also known as multiplexing or multiplex assay, is a technique used in laboratory diagnostics to simultaneously analyze multiple analytes or targets in a single test. It allows for the efficient and cost-effective detection of multiple biomarkers or genetic variants in a single sample.

Traditionally, diagnostic tests would focus on a single target, requiring separate tests for each analyte of interest. Multiplex testing revolutionizes this process by enabling the detection of multiple targets in a parallel and high-throughput manner.

There are different methods of multiplex testing, depending on the specific application and technology used. Here are a few examples:

- Multiplex Polymerase Chain Reaction (PCR): PCR is a widely used technique to amplify and detect specific DNA sequences. Multiplex PCR involves designing primers that can amplify multiple target DNA sequences simultaneously. By incorporating different fluorescent dyes or molecular tags, the amplified products can be differentiated and detected in a single reaction.

- Multiplex Immunoassays: These assays are used to detect and quantify proteins or antibodies in a biological sample. Multiplex immunoassays employ different types of capture beads or microarrays, each coated with specific antibodies or antigens. By labeling the analytes with fluorescent or enzymatic tags, multiple targets can be detected and quantified simultaneously.

- Mass Spectrometry-based Multiplexing: Mass spectrometry can be used for multiplex analysis by labeling analytes with unique mass tags. By introducing stable isotopes or mass labels, multiple samples can be combined and analyzed together, allowing for the simultaneous detection of multiple targets.

Multiplex testing offers several advantages over single-target assays, including reduced sample volume requirements, lower costs, and faster turnaround time. It has found applications in various fields, including clinical diagnostics, infectious disease testing, genetic testing, and drug discovery.

The Evolution of Multiplex Testing

The concept of multiplex testing has been evolving over several decades, and the specific techniques used in multiplex testing have been developed and refined over time. Here are some key milestones in the history of multiplex testing:

- **1980s:** The development of enzyme-linked immunosor bent assays (ELISAs) laid the foundation for multiplex immunoassays. ELISAs allowed for the quantification of a single analyte, but researchers began exploring ways to expand the assay to measure multiple targets simultane ously.

- **1990s:** Multiplex PCR techniques started to emerge during this period. Researchers began developing methods to amplify and detect multiple DNA targets using PCR, such as multiplex allele-specific PCR (AS-PCR) and multiplex ligation-dependent probe amplifica tion (MLPA).

- **Late 1990s to early 2000s**: The advent of microarray technology revolutionized multiplex testing. DNA microarrays allowed for the simultaneous analysis of thousands of genetic targets. This technology enabled gene expression profiling, SNP genotyping, and other multiplex applications.

- **2000s:** The field of multiplex immunoassays expanded with the introduction of microsphere-based technologies. Luminex Corporation introduced the xMAP® (Multiplexed Assays with Beads) technology, which uses color-coded beads to enable the detection of multiple analytes simultaneously.

- **2010s:** Advances in next-generation sequencing (NGS) technologies facilitated high-throughput multiplex sequencing. Techniques such as targeted sequencing panels and amplicon sequencing allowed researchers to simultaneously analyze multiple genetic variants or mutations.

These milestones illustrate the progressive development and application of multiplex testing techniques. The field continues to evolve, with ongoing advancements in technology, assay design, and data analysis methods, enabling even more comprehensive and efficient multiplex testing capabilities.

Multiplex Testing at the Point of Care

Multiplex testing at the point of care refers to the use of multiplex assays or devices in settings outside of a central laboratory, such as clinics, doctor's offices, or even at home. Point-of-care multiplex testing offers several advantages, including rapid results, immediate clinical decision-making, and improved patient management. Here are some examples of how multiplex testing is used at the point of care:

- **Infectious Disease Diagnosis:** Multiplex assays are commonly used for the simultaneous detection of multiple pathogens in infectious disease diagnostics. Point-of-care multiplex tests can rapidly identify the

presence of multiple viral, bacterial, or parasitic pathogens in a single sample, enabling timely diagnosis and appropriate treatment decisions. For example, a single test may detect respiratory viruses like influenza A and B, respiratory syncytial virus (RSV), and SARS-CoV-2 (the virus that causes COVID-19).

- **Syndromic Panels:** Syndromic panels combine multiplex testing with a broad range of targets related to specific clinical syndromes, such as respiratory infections, gastrointestinal infections, or sexually transmitted infections. These panels can simultaneously detect multiple pathogens associated with a particular syndrome, providing a comprehensive diagnostic approach and aiding in targeted treatment.

- **Pharmacogenetics:** Point-of-care multiplex testing can be utilized to analyze multiple genetic variants associated with drug metabolism or treatment response. These tests can provide insights into an individual's genetic profile and help guide personalized medication selection or dosing adjustments.

- **Cancer Biomarkers:** Multiplex assays can be used at the point of care to detect multiple cancer biomarkers, such as specific mutations or protein markers. These tests aid in cancer diagnosis, prognosis, and treatment decision-making, allowing for a more targeted and personalized approach.

- **Rapid Screening:** Multiplex tests can be employed for rapid screening of various conditions or diseases. For instance, multiplex lateral flow assays are commonly used for point-of-care testing of pregnancy, infectious diseases, cardiac markers, or drug testing. These tests provide quick results and are often simple to use, making them suitable for non-laboratory settings.

Recent advancements even include CLIA Waived multiplex testing, allowing healthcare professionals to make immediate and informed decisions, leading to improved patient care and outcomes.

As we ramp up for cold and flu season and patient begin to fill your exam room with coughs, congestion, and fevers, remember there are sound diagnostic multiplex tests available to assist in your diagnosis.

MyInspection® – CLIA Compliant, User-Friendly, Cost-Effective, Electronic Documentation System

- Move from Waived to Non-Waived Testing with the help of experts
- Expand testing, don't worry about all the work- policies, fillable forms, e-signatures, calendar reminders included

BIOFIRE SPOTFIRE

From bioMerieux

bioMérieux knows that an evolving world deserves evolved diagnostics. Our latest innovation, the BIOFIRE® SPOTFIRE® Respiratory Solution, is the first FDA-cleared and CLIA-waived COVID-19 testing solution. The BIOFIRE® SPOTFIRE® System is an easy-to-use system that runs the BIOFIRE® SPOTFIRE® Respiratory (R) Panel. Benefits of the SPOTFIRE Respiratory Solution include: 15 respiratory targets on 1 PCR test with results in about 15 minutes; minimal benchtop space with vertical scalability up to four modules; easy to use with an intuitive user interface.

NOVA PRIMARY BLOOD GLUCOSE REFERENCE ANALYZER

From Nova Biomedical

The U.S. FDA has cleared Nova Primary as a blood glucose reference analyzer that fills the need for a new reference analyzer to replace the YSI STAT PLUS 2300 (YSI, Inc., Yellow Springs, OH). Manufacturers of blood glucose measuring devices and clinical diabetes researchers have relied on the YSI 2300 as a reference and correlation analyzer. However, YSI, Inc. no longer supports the analyzer, and its discontinuation has left a critical industry void. With today's FDA clearance, Nova Primary from Nova Biomedical is now available in the U.S. and worldwide.

PAD TESTING SYSTEMS IDEAL FOR PRIMARY CARE TO VASCULAR SPECIALISTS

from Newman Medical

Your Patients Trust YOU To Find Their Peripheral Artery Disease

- High-risk patients include those over 65, diabetics, and smokers.
- If left untreated, 25% of patients with PAD will experience a heart attack or stroke within 5 years.
- PAD symptoms are often mistaken for arthritis or old age.

The simpleABI Cuff-Link System is Easy to Learn and Use.

- With a push-button remote, automatic calculations, and waveforms, it's incredibly user-friendly.
- Reports are straightforward to save and share since the system is PC-based.

Outstanding Value and Reimbursements

- The system pays for itself in less than a year with just one test per week.
- Medicare reimbursements vary by exam and location, averaging from $91 to $174.

Experience the Epitome of

SOUTHERN CHARM AND ELEGANCE *at*

THE FOUR SEASONS HOTEL NASHVILLE

BY JEN HELMLE, TRAVEL EDITOR

Known for its rich musical heritage, vibrant nightlife, and Southern charm, Nashville is a city that effortlessly blends tradition and modernity. In the heart of this bustling metropolis stands The Four Seasons Hotel Nashville, a beacon of luxury and sophistication. It is a quintessential destination for discerning travelers, exploring its opulent accommodations, world-class amenities, exquisite dining options, and the magnetic allure of its surrounding area.

Luxurious Accommodations

Opened in November 2022, The Four Seasons Hotel Nashville redefines luxury with its meticulously designed rooms and suites. Upon entering, guests are greeted with an ambiance that marries modern elegance with the warmth of Southern hospitality. The hotel offers a variety of room categories, each thoughtfully curated to provide a unique experience.

Guest Rooms and Suites

Deluxe Rooms: These rooms are perfect for travelers seeking a cozy yet sophisticated retreat. With king-sized beds draped in sumptuous linens, floor-to-ceiling windows offering panoramic views of the Nashville skyline or the Cumberland River, and spacious marble bathrooms, every detail has been considered to ensure maximum comfort.

Premier Rooms: These rooms elevate the guest experience with additional space and enhanced amenities. Guests can enjoy a separate seating area, perfect for unwinding after a day of exploration. The luxurious bathrooms feature deep soaking tubs and rain showers, providing a spa-like experience in the privacy of your room.

Suites: For those seeking the pinnacle of luxury, the suites at The Four Seasons Hotel Nashville do not disappoint. Ranging from one-bedroom to the expansive Presidential Suite, these accommodations offer unparalleled opulence. Each suite features a separate living area, dining space, and a fully equipped kitchenette. The decor seamlessly blends contemporary design with classic Southern elements, creating a warm and inviting atmosphere.

Unrivaled Amenities

The Four Seasons Hotel Nashville is renowned for its exceptional amenities, designed to cater to every whim of its guests. Whether you are visiting for business or leisure, the hotel's facilities ensure a memorable and seamless stay.

Fitness Center

The hotel's state-of-the-art fitness center is equipped with the latest in exercise technology. Open 24/7, it features a range of cardio and strength-training equipment, allowing guests to maintain their fitness regimen at any time. For those who prefer guided workouts, the hotel offers personalized training sessions and a variety of fitness classes, including yoga and Pilates.

Spa and Wellness

A highlight of The Four Seasons Hotel Nashville is its luxurious spa, a sanctuary of relaxation and rejuvenation. The spa offers an extensive menu of treatments, from soothing massages to invigorating facials, all using premium, natural products. The serene

environment, coupled with the expertise of the spa therapists, ensures a transformative experience that rejuvenates the body and mind.

Business Services

For business travelers, The Four Seasons Hotel Nashville provides a comprehensive suite of services to facilitate productivity. The business center is equipped with modern workstations, high-speed internet, and printing facilities. Additionally, the hotel offers several meeting and event spaces, each fitted with advanced audiovisual technology and supported by a dedicated events team, making it an ideal venue for conferences, meetings, and social gatherings.

Culinary Excellence

Dining at The Four Seasons Hotel Nashville is an experience in itself! The hotel's culinary offerings are a testament to Nashville's rich gastronomic heritage, combined with innovative twists that cater to contemporary palates.

Mimo Restaurant and Bar

The hotel's signature restaurant, Mimo Restaurant and Bar, is a culinary gem that showcases the best of Southern cuisine. Under

the guidance of acclaimed chef Aniello Turco, the restaurant serves dishes made from locally sourced ingredients, ensuring freshness and authenticity. The menu features a mix of classic Southern Italian comfort food and modern interpretations, from succulent fried chicken and buttermilk biscuits to artisanal charcuterie boards and fresh seafood.

The bar at Mimo is equally impressive, offering an extensive selection of craft cocktails, fine wines, and local beers. The bartenders are true mixologists, crafting unique cocktails that reflect the flavors and spirit of Nashville.

The Café

For a more casual dining experience, The Café at The Four Seasons Hotel Nashville is the perfect spot. Open throughout the day, it offers a variety of light bites, pastries, and beverages. Whether you're in the mood for a leisurely breakfast, a quick lunch, or an afternoon coffee, The Café provides a relaxed atmosphere with impeccable service.

In-Room Dining

For those who prefer the comfort and privacy of their room, the hotel offers an extensive in-room dining menu. Available 24/7, it features a range of dishes from hearty breakfasts to late-night snacks, all prepared with the same care and quality as the hotel's restaurants.

7th Floor Pool and Bar

One of the standout features of The Four Seasons Hotel Nashville is its 7th-floor pool and bar. This rooftop oasis offers a serene escape from the hustle and bustle of the city, with breathtaking views of the Nashville skyline as a backdrop.

The Pool

The outdoor pool is a haven for relaxation and leisure. Surrounded by comfortable loungers and cabanas, it provides the perfect setting for soaking up the sun or enjoying a refreshing swim. The pool area is beautifully landscaped, with lush greenery and elegant design elements that create a tranquil ambiance.

The Bar

Adjacent to the pool is the rooftop bar, a chic and stylish venue that serves a variety of beverages and light snacks. The bar's menu features an array of handcrafted cocktails, fine wines, and local brews, making it an ideal spot for a leisurely afternoon drink or a pre-dinner aperitif. As the sun sets, the bar transforms into a vibrant social hub, offering the perfect vantage point to enjoy the city's twinkling lights.

Exploring Nashville

The Four Seasons Hotel Nashville is ideally situated for exploring the city's vibrant culture, renowned music scene, and dynamic nightlife. Just steps away from the hotel, guests can immerse themselves in the best that Nashville has to offer.

Music Scene

Nashville is famously known as the "Music City," and staying at The Four Seasons Hotel places guests right in the heart of this musical epicenter. A short walk from the hotel, you'll find Broadway, a bustling street lined with honky-tonk bars and live music venues. Here, you can experience the electrifying energy of Nashville's music scene, with performances ranging from country and blues to rock 'n' roll.

Ryman Auditorium: Known as the "Mother Church of Country Music," the Ryman Auditorium is a historic venue that has hosted legendary performances for over a century. Its rich history and acoustics make it a must-visit for any music enthusiast.

Country Music Hall of Fame and Museum: A stone's throw from the hotel, this museum offers an in-depth look at the history and evolution of country music. With its extensive collection of artifacts, exhibits, and interactive displays, it provides a comprehensive and engaging experience for visitors.

Bar and Entertainment Scene

Nashville's nightlife is as diverse as its music, offering a variety of bars, lounges, and entertainment venues to suit every taste. The Four Seasons Hotel Nashville's central location makes it easy for guests to explore this dynamic scene.

The Patterson House: A short drive from the hotel, The Patterson House is a speakeasy-style bar known for its craft cocktails and intimate setting. The bar's skilled mixologists create bespoke drinks using high-quality spirits and fresh ingredients, making it a favorite among locals and visitors alike.

Acme Feed & Seed: Located on Broadway, this multi-level venue offers a unique blend of dining, drinking, and entertainment. The rooftop bar provides stunning views of the Cumberland River, while the lower levels feature live music, Southern cuisine, and an extensive selection of beers and cocktails.

The Bluebird Café: For a more laid-back evening, The Bluebird Café is an iconic venue known for its intimate performances and singer-songwriter showcases. It's a great place to discover emerging talent and enjoy acoustic sets in a cozy atmosphere.

The Four Seasons Hotel Nashville is more than just a place to stay; it's a gateway to experiencing the best of what Music City has to offer. From its luxurious accommodations and world-class amenities to its prime location in the heart of downtown, this hotel provides an unparalleled experience for travelers seeking the perfect blend of comfort, sophistication, and Southern charm.

Whether you're visiting Nashville for a weekend getaway, a business trip, or a special occasion, The Four Seasons Hotel Nashville promises an unforgettable stay. Its dedication to excellence in service, coupled with its deep connection to the local culture, ensures that every guest leaves with cherished memories and a desire to return.

As you plan your next trip to Nashville, consider The Four Seasons Hotel as your home away from home. Embrace the luxury, immerse yourself in the music, and discover the vibrant spirit of this incredible city.

OSOM® BVBLUE®

From Sekisui Diagnostics

The OSOM® BVBLUE® detects elevated vaginal fluid sialidase activity, an enzyme produced by bacterial pathogens associated with bacterial vaginosis including Gardnerella, Bacteroides, Prevotella and Mobiluncus. OSOM® BVBLUE® is more sensitive than Amsel criteria providing physicians with a more accurate diagnosis to treat and minimize serious health consequences such as early spontaneous preterm births and miscarriage.
